Professional summary

I am a Full Stack developer with a strong foundation in front-end and back-end technologies. I have experience building web applications using Java, JavaScript, TypeScript, Python, and frameworks such as React and Angular. I can work on all stages of software development, from initial idea to deployment and maintenance.

Professional Experience

Freelance developer **2021 - present**

Full stack developer

- Development of custom web applications for clients from various sectors.
- Creation of modern and functional interfaces with React and Angular.
